## CSB System and Program Indicators Report Evaluation

### Definitions and Methodology – FY06

---

The Evaluation Definitions and Methodology document incorporates methodologies that are applicable to all variables contained within the System and Program Indicators Report.

The FY2006 System and Program Indicators Reports monitors the current CSB shelter, services and permanent supportive housing programs using CSB's established performance standards. The report evaluates each program based on a program goal, actual performance data, variances, and outcome achievements.

Agency performance outcome goals were compared with actual performance to determine consistency with CSB standards. All data generated from the Homeless Management Information System and used in the report met CSB quality assurance standards, which require current and accurate data and a 95% completion rate for all required HMIS data variables. The CSB Homeless Census Report, a standard CSB report that is produced using Crystal Reports, constitutes the data source for the CSB-funded emergency and inebriate shelters. The following information provides an explanation of specific definitions and methodologies used in our evaluations.

#### Program Indicators

##### 1. **Average CSB Direct Client Assistance (DCA) Amount per Household (Direct Housing and Transition Program)**

- Source:** CSB Direct Client Assistance Report
- Defined:** The average amount of total CSB direct client assistance received per household during the period. *Note: cumulative total for households with multiple instances of service during the period.*
- Calculated:**  $\sum(\text{Total monetary assistance awarded to all households}) / \text{total number of distinct households that received assistance.}$

##### 2. **Average Length of Stay**

###### a. Family Housing Collaborative (FHC)

- Source:** HMIS Custom Report
- Defined:** The average number of days that total distinct households were served from the point of FHC entry date to YWCA Family Center exit date. *Note: Families who had an FHC entry date after their YWCA Family Center exit date are excluded from this calculation.*
- Calculated:**  $\sum(\text{YWCA Family Center exit date} - \text{Direct Housing entry date}) / \text{the number of total distinct households served and exited from program during the period}$

###### b. Tier I and Tier II Shelters

- Sources:** Daily Bedlist Report for Emergency & Inebriate Shelters
- Defined:** The average number of shelter units received per distinct household served by the program during the period.
- Calculated:**  $\text{The total number of bedlist units for the period} / \text{the number of total distinct households served}$

### 3. Households / Clients Served

- Sources:** Homeless Census Report <sup>1</sup> for Emergency & Inebriate Shelters;  
HMIS Custom Report for Resource Specialists, PSH, Outreach, Prevention,  
Direct Housing;  
CSB Direct Client Assistance Report for CSB Transition
- Defined:** The number of distinct households served by the program<sup>2</sup> during the evaluation period. Distinct households served are identified by their last service record for the program entered into HMIS as of June 30, 2006. Note that clients served equals households served for Permanent Supportive Housing. For resource specialists, data is rendered distinct **after** the records of clients who did not use the resource specialist services during the report period have been removed.
- Calculated:** The number of distinct households served, based on the last service record for the program as of the end of the period.

### 4. Housing Stability

- Source:** HMIS Custom Report
- Defined:** The average length of time measured in months that distinct clients reside in the Permanent Supportive Housing unit. Measure is not calculated for those programs undergoing full lease up.
- Calculated:** Step 1: Calculate the total days housed for each client by subtracting the Entry Date from the Exit Date or end of period for all records.  
Step 2: Determine the average length of stay for all the clients by dividing the sum of total days housed by the number of clients served.  
Step 3: Divide the average length of stay by 30.5, which is the average number of days in a month.
- Housing stability is measured using the total average client length of stay (from intake to exit date or 6/30/06, if still a resident) divided by the total average days per month (30.5 days).

### 5. Occupancy (number, rate)

#### a. Permanent Supportive Housing

- Source:** HMIS Custom Report
- Defined:** A percentage that reflects the average number of clients residing in a program per night relative to the program capacity.
- Calculated:** *Number:*  $\sum((\text{exit date or end of period} - \text{entry date or beginning of period}) + 1) / \text{days in period}$   
*Rate:* **Number divided** by the program capacity

#### b. Emergency Shelters

**Note:** Evaluated only for Tier II Emergency Shelters; monitored but not evaluated for Tier I Shelters

- Source:** HMIS ShelterPoint Bedlist Report
- Defined:** A percentage that reflects the average number of households that stayed in each emergency shelter per night during the period relative to the emergency shelter's program capacity. *Note: cumulative total for households with multiple instances of service during the period.*
- Calculated:** *Number:* Total bedlist shelter units for the period / total days during the period  
*Rate:*  
Step 1: Divide the total bedlist shelter units for the period by the number of days in the period.

<sup>1</sup> Homeless Census Report is a standard CSB report that is produced using Crystal Reports.

<sup>2</sup> For emergency shelter and supportive housing, the household is in residence for at least one day. For other non-residential programs, the agency defines what constitutes services by the program.

Step 2: Divide the results obtained in Step 1 by the program capacity.

## 6. Successful Housing Outcomes
